

A close-up photograph of a white prefabricated cabinet, likely for a kitchen sink. The cabinet is made of a smooth, white material with several circular cutouts. On the right side, there is a brass faucet with a red handle. The background is blurred, showing more of the cabinet and plumbing fixtures.

**Prefabricated cabinet solutions for water and heating**

# You set the requirements – we deliver

We know that delivery of the right product to the right place at the right time is essential for a smooth, efficient building process. That's why we can supply a prefabricated cabinet ready for installation on site. That means you can optimise planning and minimise installation time.

## Applications and solutions

Our Ready Ports are always tailored to the customer's requirements, regardless of whether installation is in a small house, terraced house, apartment block, commercial building etc.

We can supply everything from tap water cabinets to large multipurpose cabinets for cooling/radiant heating, radiators and tap water. We can prefabricate cabinets with pump and shunt groups, water meters, room controls etc. Other products such as electricity meters or heat exchangers can also be installed on request (customer-supplied).

We have cabinet sizes that fit any space requirements.

- Saves time – delivered fully assembled
- Tailor-made – to your precise instructions
- Watertight – delivered leak-tested
- More cost-effective – very fast installation
- No limitations – water, heating or multipurpose cabinets
- Just in time – on time to the right place

A prefabricated cabinet makes a job quicker and increases project profitability: the risk of mistakes is reduced.

*“We minimise installation time and give our customers a streamlined and more profitable process.”*

*Kenneth Jönsson, Ready Port Product Specialist, Uponor.*

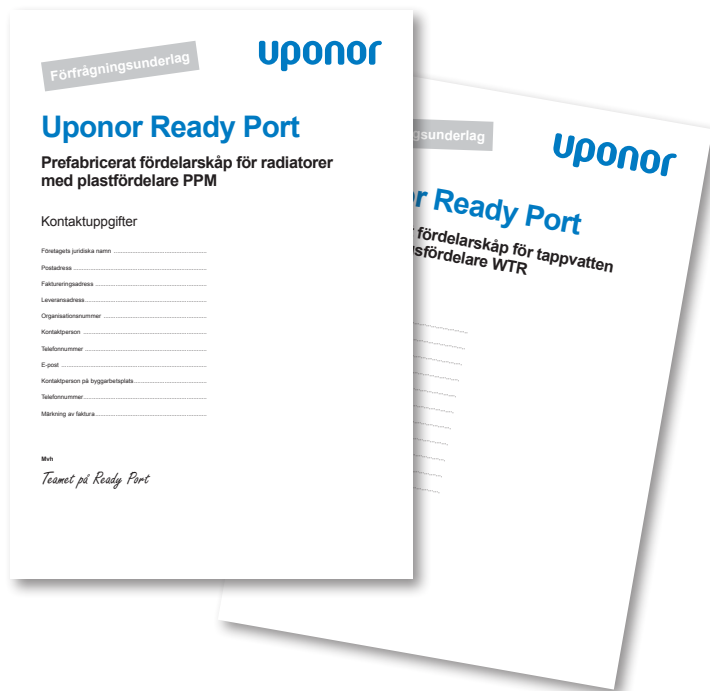

# How do we deal with enquiries?

We will provide a quote based on your specification and drawings. The quote will enable you to see the actual preconditions for the item, the cost of the cabinet, fittings and installation materials, delivery time etc.

Contact your local Uponor sales team or our Project Department for more information, and request a quote.
